FRAME DESIGN

Using lightweight, race-proven Advanced Composite material, Giant engineers created a high-performance frame that was designed with its critical parts as a single high-performance system. From the oversized OverDrive 2 steerer tube, to RideSense, an ANT+ compatible sensor built into the frame, to the ride-tuned Giant WheelSystem, it's all designed with a common goal: optimized system performance. The frame also features the MegaDrive oversized downtube and the stiff, efficient PowerCore bottom bracket. Each frame features:
