FRAME DESIGN

The TCR Advanced SL shatters the mold of every composite bike that came before it. Using Advanced SL-grade composite and a new manufacturing process that requires fewer frame sections and joints results in the lightest, stiffest road frame ever produced by Giant. Steering precision is boosted by the new oversized OverDrive 2 headtube/fork combination. The MegaDrive downtube and PowerCore bottom bracket improve power transfer and efficiency. Factor in the integrated seatpost and RideSense ANT+ sensor for wireless data transmission, and it's clear to see: TCR Advanced SL goes beyond integration. Each frame features:
